PROJECTS

Project 1: https://swflbg.com/
Technology: Wordpress/Php
Description: It is a home remodeling site. I've built this website and made it rank on 1st page. I've increased organic traffic and generated leads through it that helped business.

Project 2: https://tutorful.co.uk/
Technology: PHP, Laravel, NodeJS
Description: It is a tuition class's website where students can attend online classes according to the it timing and grade of their studies

Project 3:https://kamson.com.hk/
Technology: PHP, Laravel, NodeJS Technology: PHP, Bootstrap, jQuery
Description: It is a property broking website where customers can buy, sell, and lease properties according to their requirements.
Role: I have created search functionality for the customers to find out properties according to their particular preferences like Any location, Keywords, Price range, Seal   able area,   No. of bedrooms etc.

Project4:http://www.smilespadubai.ae
Technology: WordPress, PHP, WPBakery
Description: It is a dental clinic's website. Where customers can book appointments for different types of services like Root Canal Therapy, Teeth Cleaning, Braces, Cosmetic Dentistry ,etc.
Role: I have created pages from a provided design file using WPBakery as a page builder. I have also integrated the Google Maps API so that customers can easily find the clinic.
